Let's Talk Science!

Research in Action

P.K. Yonge Developmental Research School

UF UNIVERSITY of FLORIDA

Come spend a day learning about and observing inquiry-based, standards-driven science. Identify a school-based leadership team that includes elementary teachers from different grade levels and your school principal. Your morning will begin with an overview of the Let's Talk Science! reform process and hands-on immersion in the basic essentials of an inquiry-based science experience. During the afternoon, you will observe three to four elementary science lessons. Observation protocols and note taking sheets will be provided. At the end of the day you will have time to debrief with PKY host teachers and develop an action plan with your school team.

Monthly Dates Available

Limit: 20 participants per session

Here's what a previous Let's Talk Science! Research in Action participant had to say:

"I experienced more than I bargained for! The agenda allowed us to hear about the research, be involved with hands-on activities in science, and actually have time to observe lessons with students.... I feel like as a school we have a starting point to change and improve our science instruction. Inquiry, inquiry, inquiry! I can't wait to share!"
