Job-embedded Professional Development for Palm Beach County Elementary STEM Teachers

In this initiative, UF Lastinger staff and affiliated faculty are providing Palm Beach County elementary teachers with integrated science, technology, engineering, and mathematics (STEM) professional development.

Teachers are participating in the following: (a) guided teacher inquiry focused on specific dilemmas in the teaching of STEM content, (b) content clinics that build pedagogical content knowledge, and (c) multi-school communities of practice in which UF certified Palm Beach instructional coaches work with each other to develop strategies to support teachers in their schools.
