

Math Nation Alabama Program Features

Math Nation is honored to present a proposal to provide middle school and high school resources across Alabama. Our flexible platform works across all devices, to provide data-proven solutions to Alabama's students, educators, and families by focusing on tutoring, personalized learning, and supporting all families and community members. More than 20 United States patents have been issued to Math Nation for its new ways of leveraging technology to help students. From allowing students to earn Karma Points for helping their peers with math across the state at night and on the weekends, to better serving students without reliable internet connections, Math Nation is a leader in education technology.

Math Nation is proven to increase proficiency in math as well as emphasize the importance of math in the real world and comes highly recommended from other states' Department of Educations. For example,

- A University of Florida study found that over 400 Title 1 schools frequently utilizing the Math Nation platform had proficiency rates 17% higher on End-of-Course Exams than low-usage Title 1 schools.
- A Mississippi State University study found that high-usage schools had an 8.6 percent higher pass rate than the state average on the Mississippi Academic Assessment Program (MAAP) test.
- Students who utilized Math Nation at least 30 times over the school year demonstrated improved scores, including students who are typically most at risk for failure.

Several other studies have also proven Math Nation's efficacy.

We look forward to the opportunity to support Alabama in the following courses:

- 6th Grade Math
- 7th Grade Math
- 8th Grade Math
- Algebra 1 with Probability
- Geometry with Data Analysis
- Algebra 2 with Statistics
- ACT[®] Prep
- PSAT[®]/SAT[®] Prep

Math Nation will provide resources for 6th Grade Math, 7th Grade Math, and 8th Grade Math for the 2022-2023 school year, and add resources to support Algebra 1 with Probability, Geometry with Data Analysis, and Algebra 2 with Statistics for the 2023-2024 school year. Digital and print resources will be aligned to fully cover the Alabama Course of Study: Mathematics standards. Math Nation believes in an all-inclusive approach to providing resources, therefore all courses will be available for all students and educators to promote easy access to resources for remediation, intervention, and acceleration. Study Edge LLC will provide services to support the UF Lastinger Center in the delivery of the Math Nation program.
