

*Title 4, Part A: To improve student achievement by increasing Local Education Agency capacity to provide students with a well-rounded education*

The program will support the purchase of materials and supplies for continued implementation and growth in secondary (middle and high school) engineering and computer science pathways for students. Secondary students will engage in project and problem-based curricular experiences. Stakeholders involved in the identification of necessary materials/supplies and implementation of well-rounded educational opportunities will be consulted with to align well-rounded opportunities with curriculum design and implementation.
