

Overview

This planning grant with the Bill and Melinda Gates Foundation aims to engage in discussions and strategic planning around K-12 math education in Florida. The goal is to align the UF Lastinger Center's expertise in Florida's education system with the Gates Foundation's K-12 math strategy, particularly in areas such as high-quality instructional materials (HQIM), digital learning, and effective program scaling. The UF Lastinger Center will provide valuable feedback and strategic counsel based on their in-depth knowledge of Florida's unique educational landscape, including relevant programs, policies, and key local partners.
