

Statement of Work

Dr. Closser will be responsible for the overall direction and administration of the University of Florida's portion of the project. She will provide key insights into experimental design for Study 2 as well as pilot testing prior to data collection. After data collection, she will provide support for the analysis and interpretation of project findings. Dr. Closser will also lead efforts to disseminate project results including leading pre-registration of Study 2 on the Open Science Framework, dissemination of the primary analyses for Study 2 in a journal manuscript, and dissemination through conference presentations. Dr. Closser will work closely with the PI at WPI, Dr. Erin Ottmar, as well as the other Co-PIs (Drs. Hornburg and Lee) and project team throughout the duration of the project to ensure that the project activities run smoothly.
