

Overview

To encourage current member involvement and increase the potential for future membership, the Beta Chapter at UF, board members are requesting additional funding through the CSI Chapter Development Grant. As a leading national program, with a #1 ranking this current 2024-25 academic year, UF draws in top candidates in the field. To maintain high standards and train top counselors, we believe that encouraging active involvement in Chi Sigma Iota activities is a top priority. With the support of our UF CSI advisor and other faculty, CSI current board members are seeking funding/support from the national organization to further the Beta Chapter's mission of increasing membership and active involvement.

Specific goals for the Beta Chapter Development Grant will be:

- To encourage current and potential future members to attend scheduled chapter events including initiation ceremonies, workshops and other professional development opportunities
- To offset costs associated with various chapter activities including the initiation ceremony, training/workshops provided, and awards and graduation events
- To increase membership in Beta Chapter activities through communal involvement
- To provide additional opportunities for networking, collaboration, and professional growth within the chapter and larger community
