ESOL - GRADUATE COMMENTS

What knowledge/skills that you learned at UF have helped you work with English language learners?

Understanding the importance of bilingual instruction and classroom materials. Understanding that being bilingual is a strength.

Currently, I help assist my schools with completing WIDA Screeners and help develop appropriate ELL plans for those scholars. I also have helped complete the WIDA progress monitoring tool to help determine if the ELL scholars are making progress towards developing English.

Cultural considerations

IMPACT ON STUDENT LEARNING - GRADUATE COMMENTS

What did you learn in your program that specifically contributed to your effectiveness this year in increasing student learning/achievement?

The importance of matching students to targeted interventions that improve their skill in their specific area of need.

The School Psychologist program helped me specifically learn how to review intervention data and identify students that may need sustained supports through IEPs.

Preparation and understanding of various assessments, choosing appropriate assessments based on students needs/background, evidence-based interventions, consultation

In what ways could your program have helped you to have a stronger impact on your students' learning/achievement?

Since COVID, students have displayed more significant behaviors at schools. The primary grade of concern is our kindergarten scholars. I wish we would have had more opportunities to work with students specifically with the EBD exceptionality and learn to develop realistic FBAs that teachers are able to implement.

More preparation with school-based meetings/teams such as attending problem solving team meetings, Rtl meetings, interpreting and making decisions based on Rtl data and other student data, making appropriate eligibility recommendations using district policies and procedures, more focus on school-based eligibilities as opposed to diagnoses

Many of these questions I am unable to answer, as they are not relevant to the work he does as a school psychologist. They are more aligned with the role of a classroom teacher.
