The purpose of the Grant is to establish an expendable fund to support implementation of the Early Learning Florida 2.0 project. Early Learning Florida is a first-of-its-kind innovative, job-embedded statewide professional development system that aims to transform the skills of Florida’s early childhood professionals. This project will expand the system to become a robust, one-stop hub for early learning professional development that includes a full array of English and Spanish professional development courses, an interactive digital platform, a Child Development Associate credential pathway, a job-embedded associate degree pathway, a Dual Language Learner endorsement, and two regional professional learning demonstration sites.
