

Support of Algebra Nation Mississippi 2017-18

This project is a collaboration between the University of Florida and Study Edge to implement Algebra Nation in Mississippi. UF will assist in the creation of content that aligns with the Mississippi mathematics standards, such as videos and practice problems. Additionally, UF will host professional development sessions for teachers in Mississippi. UF will work to increase the usage among Mississippi students and teachers, and will participate in ensuring that the standards of the program are maintained.
