

**Evaluation of Monique Burr Child Safety Program in Florida Elementary Schools  
Year 3 (July 1, 2018 – June 30, 2019)**

In year 3 of the Monique Burr Foundation Child Safety Matters (MBF CSM) program evaluation, data collection from year 2 will continue to include 10 additional schools. The following are additional specific tasks that would be entailed during year 3.

Staff with the University of Florida, University of New Hampshire, and Monique Burr Foundation will meet via telephone biweekly to update on study progress and issues. Up to 10 schools will be recruited for year 3 participation. Eligibility will include the following: (a) did not participate in year 2 of the evaluation and (b) have not previously implemented the MBF CSM curriculum. Initial recruitment will focus on schools in rural counties to balance the sample. Once recruited, schools will be randomized to either treatment or control. One classroom per grade will be randomly selected for participation. Pre-testing will be administered as soon as schools (and districts) agree to participate and students are back in session. Pre-testing will be consistent with year 2 and include a child survey. Facilitators trained by the Monique Burr Foundation will implement the MBF CSM curriculum in treatment schools. Post-testing will be administered as soon as facilitators complete implementation. Post-testing will be consistent with year 2 and include an in-person child survey, a paper survey sent home to parents, and an electronic survey sent to teachers and facilitators. A final version of the evaluation report will be submitted to the Monique Burr Foundation.
