

**Preschool Development Grant  
University of Florida  
Anita Zucker Center for Excellence in Early Childhood Studies  
Scope of Work**

- Develop data processing, banking, and reporting tools to analyze integrated data.
- Integrate additional indicators in current needs assessment portal (ECENA).
- Complete analysis of integrated data to determine needs and determine unduplicated count of children within programs.
- Identify needs and successes of current state programs based on a comparison of the unduplicated count of children within programs.
- Determine the unique child count across programs.
- Develop report and presentation of findings to inform strategic planning process.
- Expand ECENA analysis capacity by incorporating all quality program data.
- Develop reporting capacity for the following: capacity, utilization, participation among targeted and specialized populations, seasonal and geographic fluctuations.
- Identify needs and successes of current state programs based on a comparison of the unduplicated count of children across programs.
- Integrate capacity for ongoing cost modeling into ECENA.
