

# ADVANCES IN SINGLE-SUBJECT RESEARCH DESIGN SUMMIT

MONDAY, NOVEMBER 17<sup>TH</sup> FROM 8AM-2PM IN THE TERRACE ROOM

- ❖ **FREE TO THOSE WHO ENROLL**
- ❖ **BREAKFAST AND LUNCH PROVIDED**
- ❖ **HANDS-ON WORKSHOP WITH NATIONAL EXPERTS**
- ❖ **EXAMINATION OF EFFECT SIZES COVERED**

## SPACE IS LIMITED TO 35 INDIVIDUALS!

**PLEASE RSVP TO ROSIE CONNOLLY BY WEDNESDAY, NOVEMBER 12<sup>TH</sup> AT [RCONNOLLY@COE.UFL.EDU](mailto:rconnolly@coe.ufl.edu)**

**FOR MORE INFORMATION:**  
<http://education.ufl.edu/educational-research/3929>

## GUEST SPEAKERS

### Dr. Nicholas A. Gage

has focused his work on advancing statistical and methodological rigor in the field of emotional and behavioral disorders, including the use of hierarchical linear modeling to conduct meta-analyses of single-subject design research.

**Dr. Tim Lewis** has had extensive experience supporting the needs of students with emotional and behavioral disorders and is a leading expert in single-subject research design. He is Co-Director of the Office of Special Education Programs Center for Positive Behavior Support, the Institute of Education Science and Director of the Missouri Center for School-wide Positive Behavior Supports.

### Dr. Kimberly Vannest

is widely published in the advancement of single-subject design effect sizes and has helped develop a number of non-parametric and non-overlap procedures. Her work focuses on the identification of reliable measurement of treatment effects and effect size indices in single-subject design research to improve prevention and treatment practices supporting the needs of students with emotional and behavioral disorders.
