------------------------------	-----------------------------	----------------------------

10:00am-12:00pm Hough Hall 338

Interested in getting a graduate degree in business? Join us at MS in Management Events!

The Master of Science in Management program is a 32 credit hour graduate degree designed for students without a background in business, and it can easily be finished in one year. Students gain a solid business foundation and strengthen transferable skills to open up advancement opportunities within their undergraduate major field or business sector. The program offers traditional, combined (bachelor/master) and dual degree (Master/PhD) options. In the **Combined Option**, undergraduate students from non-business academic backgrounds with at least 90 credits and a 3.2 GPA can begin taking graduate business (21 credits maximum: 12 credits counting towards both the UG and MSM degrees and 9 MSM only, or if not double-counting, 15 MSM only) with approval from their undergraduate advisors. Most undergraduate scholarships and Florida Prepaid will cover a portion of your graduate tuition while you are still an undergrad student. In the **Dual Option**, students can share 9 credits with their other graduate program, which would leave them with 23 credits to finish the MSM program in only 2 semesters.

MS in Management is an excellent opportunity to diversify your skills and make yourself more competitive and marketable in your job search.
