

Selecting a
Valid Sample Size for
Longitudinal and Multilevel
Study Designs

When

May 18th - 20th, 2016

Where

Emerson Alumni Hall
Gainesville, Florida

From graduate students to senior researchers, anyone can participate in this **short course** with only a basic background in statistics.

*Learn from **national experts** how to...*

- ▶ Compute power and sample size for longitudinal and multilevel studies
- ▶ Use GLIMMPSE, a free, online point-and-click software
- ▶ Write the power and sample size section for a grant proposal
- ▶ Strengthen your research
- ▶ Be more competitive for funding
- ▶ Learn to write a statistical analysis plan
