- **MacBook instructions**

    1. Turn on Wi-Fi and select eduroam from the list.
    2. Account name: your_own_gatorlink@ufl.edu.
    3. Type your current password and hit "OK".

** If you change your password, you will need to forget the eduroam network and repeat the steps above to reconnect.

To forget the network, follow these steps:

    1. Click the Wi-Fi symbol > Wi-Fi Settings…
    2. Click "Details…"
    3. Click "Forget This Network" and Remove Wi-Fi eduroam.
    4. Repeat the steps above to reconnect.

TCP/IP   **Low data mode**   ⚪
                         Low data mode helps reduce your Mac data usage over specific Wi-Fi
DNS   networks you select.

WINS   **Limit IP address tracking**   🔵
                         Limit IP address tracking by hiding your IP address from known
802.1X   trackers in Mail and Safari.
